User Stories

ID	As a	I want to	So that	Priority	Epic	Sprint Story Point
0	Support Service Team Member	Have a timetable scheduling website that is compatible with Microsoft Office tools (e.g., Excel)	I can easily integrate and work with timetables using familiar software, ensuring a seamless transition between the system and Microsoft Office.	High	System Compatibility	8
1	IT Administrator	Ensure that the timetable scheduling system is easily connectable to our existing school systems	We can efficiently manage data flows, reduce redundancy, and maintain a cohesive IT infrastructure without extensive reconfiguration.	High	System Integration	13
2	Support Service Team Member	Modify and delete information regarding classroom and laboratory capacities.	I can ensure the timetables reflect accurate and up-to-date location availability.	High	Timetable Management	5
3	Support Service Team Member	Upload enrollment files by selecting the campus and subject from a dropdown on the upload page	The system can auto-generate timetables based on accurate enrollment data.	High	Data Integration	8
4	Support Service Team Member	Auto-generate timetables using enrollment details and location data stored in the system	Timetables can be developed automatically without the need for manual input, ensuring efficient timetable management	High	Timetable Management	15
5	Support Service Team Member	Download timetables as an Excel file	I can easily share and review them with committee members.	Medium	Timetable Management	3
6	Support Service Team Member	Email finalised timetables to committee members.	They can review and confirm the timetables.	Medium	Communication & Sharing	5
7	Support Service Team Member	Manage the registration page, allowing admins to create accounts for other users	New users can be added by the admin after login, simplifying the user management process	Medium	User Management	5
8	IT Administrator	Store and manage classroom and laboratory locations manually in the system	The stored locations can be selected when adding subjects,	High	Location Management	8

			ensuring accurate room assignments			
9	IT Administrator	Ensure that data from previous semesters, such as subject and timetable details, is inherited for future timetables	The system can retain necessary information without re-entering it, thus reducing the labor of redundant data entry, while also retaining previous data.	High	Data Integration	5
10	Support Service Team Member	Timetable to be presented and show collision	Can review the timetable before sending to student	High	Timetable Management	10
